

MR·NET

Simple | Unbreakable | Wireless

Ultra-Reliable Internet Everywhere

Internet connectivity
That never fails

All-in-one Cellular Bonding Solution:

- ✓ Cellular Bonding Gateway
- ✓ High Priority SIMs included
- ✓ Robust Cloud Infrastructure
- ✓ Web Management Portal
- ✓ Proactive Support

Who needs MR-NET Plus?

1. Customers with Connectivity problems:

- Reliability issues**
Reliable Internet infrastructure is not a given at a job site
- High Cost**
Venue Internet is expensive, often unusable due to local IT limitations
- Complexity**
Alternative solutions are expensive and complex, hard to manage

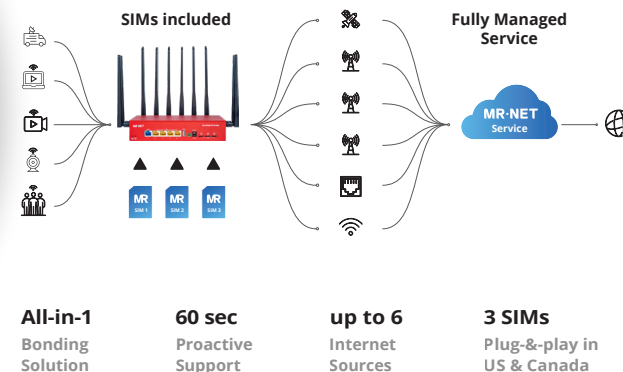

2. Prospects who Look like this:

Customer type	Why they buy	Key bullets
☐ Live Event Production / AV Companies	No Internet = No stream	MR-NET is operational and reputational insurance. It can also be a money making budget item
☐ Live Event Production / AV Companies	Portable remote production kits	Pairs extremely well with: PTZ cameras, encoders, mixers and switchers
☐ AV / MSPs	Remote support for managed services	Auto-include for large managed build-outs to provide dedicated remote access (e.g. for firmware and media updates)
☐ Trade Show Exhibitors	Venue Wi-Fi is expensive	On average, exhibitors save \$7,000 per show by choosing MR-NET, while getting superior service
☐ Emergency Services / First Responders	Mission-critical communication	When lives are on the line, internet failure isn't an option

What is MR-NET Plus?

A complete, **plug-and-play solution for reliable Internet access** in toughest environments. Powered by cellular bonding of Verizon, AT&T, and T-Mobile networks into one ultra-reliable connection. Includes hardware, high priority SIM cards, cloud management, and US-based premium support - **all in one annual subscription**.

Key Features that Sell themselves:

3-Carrier Bonding:

Verizon + AT&T + T-Mobile* working simultaneously. Can be combined with other Internet sources (satellite, local ISPs, hotspots)

Plug-and-Play setup:

Pre-configured, pre-installed high priority enterprise SIMs, ready to deploy, zero overhead

Dedicated cloud Infrastructure:

Easy to monitor, static public IPs are great for remote access workflows, lowest end-to-end latency

US-Based support:

60-second average response time

Protocol agnostic:

Compatible with any workflow

*Rogers + Telus + Bell for Canada

Why MR·NET wins Against alternatives?

MR·NET vs. Single-Source Internet:

MR·NET bonds up to 6 independent channels, removing down time

MR·NET vs. Cellular Bonding Encoders:

MR·NET is compatible with any protocol, any hardware, and any ecosystem. No walled gardens, more than just for video

MR·NET vs. Other advanced networking solutions:

MR·NET is completely plug-and-play, zero technical expertise required

MSRP Pricing

- ✓ **\$2,498** - Total purchase price
- ✓ **\$1,499** - Second year annual renewal
- ✓ **\$8/GB** - Data usage (paid separately)
- ✓ **Priority live support** - Included
- ✓ **Pre-installed enterprise tier SIMs** - Included

Benefits of selling MR·NET:

- ✓ **Enables new workflows**
Amplifies other products (especially in remote production)
- ✓ **Increases deal value**
Suitable add-on for many high-value builds
- ✓ **Recurring revenue model**
Annual subscriptions = ongoing commissions
- ✓ **Full support from MR·NET team**
We handle technical questions and onboarding
